

PRESSURE-BOOSTING SYSTEM FOR A LUXURY DISTRICT IN DOHA

WHERE:

Alfardan Gardens 8 is the new residential district in **Doha**, the cultural and artistic capital of **Qatar**.

Just ten minutes from the commercial heart of the city, it is surrounded by unusual vegetation for a desert area and comprises 140 residential units with luxury finishes, sophisticated technologies and excellent services.

The investor is DANAT QATAR Real Estate LLC, owned by the Alfardan family, which invests regularly in luxury and high-standard properties, always completed with surprising speed.

WHEN:

March 2016

THE REQUEST: WATER PRESSURE BOOSTING AND FIRE-FIGHTING SYSTEMS

The pressure boosting sets installed supply 140 units, thermal services, swimming pools, various public buildings and the irrigation of the green areas.

The building company in charge of the works is "Bukshisha Building Construction Co. Llc", with engineering consultancy by "CEG Consulting Engineering International", and the collaboration of the company "S.E.T.C. Safetech Electromechanic Trading & Contracting Co".
