

e.sybox FOR THE KVILDA VISITOR CENTRE IN ŠUMAVA NATIONAL PARK, CZECH REP.

WHERE:

The forest of **Šumava** and the nearby Bavarian Forest form the largest area of woodland in Central Europe, known as the "Green Roof of Europe".

The Šumava National Park is home to various important European species of large mammals, such as lynx, deer and moose, and many bird species facing extinction. The Kvilda Visitor Centre is located here.

WHEN:

March 2015

INSTALLER:

IVAR CS spol. s r.o.

THE REQUEST:

Recently opened, the Kvilda Visitor Centre is the base for a zoological programme. The building was built using renewable energy and innovative plants, including a pumping station consisting of two e.sybox devices and an e.sytwin which provides constant pressure to the entire water system.
