

CENTRAL HEATING SYSTEM FOR A RESIDENTIAL BUILDING IN MYSLOCOVICE

WHERE:

Myslocovice is a municipality in the Zlín district of the region of Zlín, in the Czech Republic.

WHEN:

December 2016

INSTALLER:

IVAR CS spol. s r.o.

THE REQUEST:

The commission was to install a water supply and pressurisation system in a small residential building in Myslocovice.

Due to the need to adapt to a very small technical room, the project envisaged the installation of an e.sybox, the innovative integrated electronic pressurisation system by DAB which, thanks to its compact size (263L x 352W x 564H) and the e.sywall accessory (complete with brackets, screws, dowels and two vibration absorbing damper), allowed to achieve an overall dimensions 50% smaller than those of a traditional system.

- 1 E.SYBOX

- 1 E.SYWALL
