

NEW 1KVT FIRE-FIGHTING SET FOR CONSORZIO AGRARIO IN FRIULI VENEZIA GIULIA

WHERE:

Azzano Decimo (Dassan in Venetian and in western Friulian dialect) is an Italian municipality with a population of 15,726 in the province of Pordenone in Friuli-Venezia Giulia.

WHEN:

July 2017

CUSTOMER:

Consorzio Agrario

THE REQUEST:

For Consorzio Agrario, we installed a 1KVT EN 12845 fire-fighting set comprising an axial flow vertical submersible pump with 5.5 kW electric motor, including a submersible pump, cork plug, control head mounted on a suitable base, and an electric control panel.

The choice of this set was the most suitable as, thanks to the submersible pump body and the motor assembly control above the surface, it eliminates any priming issues, in addition to making the job of the maintenance technician much easier.

The vertical submersible pump is treated with black cataphoresis paint coating to ensure a high degree of resistance to corrosion, while the control heads, base, frame, hydraulic column and manifolds are painted red.
